

Cimini 113611

REMARKS

The abstract is amended herein to make it a more focused single paragraph.

Claims 1-39 and 44-82 were rejected under 35 USC 112, first paragraph for failing to comply with the enablement requirement. Applicants respectfully traverse, believing that the inherent characteristics of signals, which the inventors disclosed particularly in the discussion at pages 8-14 provides support to the all of the claims, and certainly to some of the narrower ones.

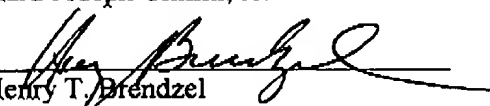

Nevertheless, applicants amend herein most of the claims, and significantly reduced their number in order to advance prosecution. It is respectfully submitted that the claims as amended are fully supported by the specification, in compliance with 35 USC 112, first paragraph.

Claims 1-39 and 44-82 were rejected under 35 USC 112, second paragraph. Applicants respectfully submit that the amended claims fully comport with 35 USC 112, second paragraph.

In light of the above amendments and remarks, applicants respectfully request reconsideration, and if no art rejection is appropriate, allowance of the outstanding claims.

Respectfully,
Bruce Edward McNair
Leonard Joseph Cimini, Jr.
